ABH HydroMaster 46

ABH HYDROMAX 46 represents an advanced generation of hydraulic oils specifically engineered to meet the demands of heavy machinery and precision industrial systems. With its enhanced formula, the oil provides superior stability under extreme pressure, ensuring efficient power transmission and rapid hydraulic response. The ISO VG 46 viscosity grade makes it ideal for operation across a broad temperature range, maintaining consistency to minimize internal friction and protect pumps and valves from premature wear. It also features excellent air and water separation properties, preventing foam buildup and protecting the system against rust and oxidation, ensuring continuous performance in the harshest field conditions.

TEST	Method	Result	Unit
Appearance	ASTM D 1524	Clear and Bright	
Color	ASTM D 1500	1.8	
SP.gr@15C	ASTM D 1298	0.880	
Flash Point	ASTM D 92	215	C.
Pour Point	ASTM D 97	-15	C.
Viscosity @40C	ASTM D 445	45	Cst
